

UXForms

an enterprise-ready cloud platform for forms development

Example production forms

We have collated a selection of forms implemented in UX Forms which show off some of its most powerful features.

We have chosen examples across private, government and health sectors, and forms that have been built both by our customers and by ourselves on our customers' behalf.

UX Forms' own documentation

UX Forms provides a reference implementation of the GOV.UK Design System. We have written a form, in UX Forms, that describes how to use this theme and each accompanying widget.

This form demonstrates

- How to use every GOV.UK Style, Pattern and Component included in UX Forms' theme
 - Multiple themes in use on the same form
 - Simple password-based access control
- 

<https://forms.uxforms.com/gds-design-system-form>

ALPHA This is a new service – your [feedback](#) will help us to improve it.

UX Forms + GDS Design System

This is a form, built entirely in UX Forms, that demonstrates how to use our built-in GDS Design System theme.

How to use

To get started, change the theme name in your form's `build.sbt` to look like this:

```
themeName := "gds-design-system-theme"
```

Then to make use of the theme, you'll need the accompanying widgets:

```
libraryDependencies += "com.uxforms" %% "gds-design-system-dsl" % 1.3.2
```

Intellectual Property Office

Intellectual
Property
Office

UX Forms has been used in production at the Intellectual Property Office (IPO) since 2016.

In that time it has become their default solution for citizen-facing digital services, across multiple departments.

Apply for a trade mark

The IPO's most high-profile and complex digital journey, Apply For a Trade Mark is a bespoke transactional service used by both intellectual property professionals and members of the public.

This form demonstrates

- File upload, integrating with IPO's bespoke antivirus and file transformation APIs
 - Complex conditional branching and looping logic
 - Integration with multiple bespoke JSON/HTTP and SOAP APIs
 - Integration with IPO's payment gateway
 - Save and Resume, with a user-defined password
- 

<https://trademarks.ipo.gov.uk/ipo-apply>

Apply to register a trade mark

At least one of the trade mark owners, or their representative must have a postal address within the United Kingdom, Gibraltar and the Channel Islands.

Who is completing this application?

- ☐ The trade mark owner or authorised person within their business
- ☐ An attorney, solicitor, in house trade mark department or third party representative

Search for a trade mark

Searching for a trade mark by owner enables people to search the database of trade marks. Search results are also displayed as part of the form journey.

This form demonstrates

- A non-transactional user journey, i.e. it has no defined end or submission step
 - Paginating data read from a private SOAP API
 - Re-usable bespoke UI components to display search results
- 

<https://trademarks.ipo.gov.uk/ipo-tmowner>

Search for a trade mark

by owner

This service allows you to find UK national trade marks owned by a person or company. This service does not extend to trade marks filed through the European or International trade mark protection routes.

Owner's name

Owner's postcode (UK only)

Postcodes must be entered in the standard UK format. For example, NP10 8QQ.

View a trade mark

UX Forms provides the user interface to the database of trade marks in the UK. The canonical URL for a trade mark is rendered using UX Forms.

This form demonstrates

- Integrating with a bespoke API in a non-transactional journey – before rendering, the form fetches data for the requested trade mark by making an API call based on the request URL
- High load – this form often sees over 5 million requests per month

Torfaen County Borough Council

Torfaen County Borough Council were looking for a managed solution to run a new service for professionals to raise concerns with the welfare of children under their care.

UX Forms provided a fully-managed service to build, test, deploy and run this new digital service, as well as provide ongoing maintenance and insights into its use in production.

Report a concern about a child

Childcare professionals use this new service to inform the council of their concerns about a child under their care.

This form demonstrates

- Adapting UX Forms' GOV.UK theme for use outside central government
 - Trust in UX Forms to handle customers' most sensitive data
 - Internationalisation – the form can be completed in either English or Welsh (and can be switched at any time without losing progress)
 - Embedded rules within the form drive question conditionality, as well as how the collected data is eventually submitted
- 

<https://torfaen.stage-sandbox.uxforms.net/report-a-concern-about-a-child>

(a pre-production test instance, due to the sensitive nature of the service)

Report a concern about a child or young person

This service is for professionals who have a concern about a child or young person. It helps them to:

- assess the child's needs, and
- find the most appropriate support

! If a child or young person is at immediate risk call 999.

How it works

1. You answer some questions about the child you are contacting us about (if you want to add more than one child to your referral, begin with the one you are most concerned about).
2. We map your responses against Torfaen's Threshold of Need and Eligibility Criteria, and take into account the previous referrals for the child (if any).
3. We recommend appropriate next steps; either a Duty to Report (formerly MARF) referral, Families First referral, or other early intervention services.

3. We recommend appropriate next steps; either a Duty to Report (formerly MARF) referral, Families First referral, or other early intervention services.
4. If a Duty To Report or Families First referral are recommended, you can complete these online too, building on the information you have already entered. Once complete, you will be emailed a copy of your submission.

Before you start

To complete your referral make sure you have:

- the name, date of birth (or estimated date of delivery)

The password to access the form is razor-drink-unhinge

Hospice UK

The Planning Ahead tool was started by members of the public to help people think about the treatments they may, or may not, wish when nearing the end of their life.

A team of doctors and nurses added medical information, and a panel of expert organisations have lent their expertise and support to the project.

Planning Ahead

The Planning Ahead tool explains the kinds of decisions many people wish they had prepared for, and it gives various options to think about.

UX Forms donated time and resources to turn a previously built prototype into a production-ready service.

This form demonstrates

- A bespoke theme, using html & css provided by a third party
 - A form running on a custom domain
 - Built-in PDF generation
- 

<https://advancecareplanning.org.uk>

Planning Ahead

What matters most to you?

Provided by  hospice^{UK}

Welcome to our 'Planning Ahead' tool.

All our lives we prefer to make choices about the way we live, and we make these choices based on what matters most to us. Everyone is different, and their choices are different, too.

If we meet health problems in the future, we will want to make choices about how we are treated. Sometimes there are lots of options and sometimes options are limited, but we will still make our decisions based on what matters most to us.

Sometimes, people don't feel well enough to choose at the time when important health-care decisions need to be made. This tool is about thinking ahead about some of those choices, so you can decide what matters most to you and consider some of those choices ahead of time.

What are your personal priorities? +

Who can use this tool? +
